

Recipe Corner

Karen went to a supermarket to pick up some groceries. Later, her husband noticed her sitting in her car in the driveway with the car running and the windows rolled up. Her eyes closed with both hands behind the back of her head. He walked over to the car and noticed that Karen's eyes were open but she looked very strange. He asked if she was okay; Karen said she had been shot in the back of the head and was holding brain matter and blood in. Then he called the paramedics, who broke into the car because the doors were locked and Karen refused to remove her hands from her head. When they finally got in, they found that Karen had a wad of biscuit dough on the back of her head. From the back seat a Pillsbury biscuit canister had exploded from the heat, making a loud noise that sounded like a gunshot, and the wad of dough hit her in the back of her head. When she reached back to find out what it was, she felt the dough and thought it was her brains. She passed out, but recovered. She is blonde, a Democrat, and a Biden supporter; but that could all be a coincidence. The defective canister was analyzed and it was determined to be Trump's fault.

The dough boy died of a severe yeast infection.

The protected need to be protected from the unprotected by forcing the unprotected to use the protection that didn't protect the protected?

All the news I see fit to print.

Freedom of the press belongs to those who own one.

	Pfizer: \$4.7 billion in fines for false claims, drug and medical equipment safety violations, off-label promotion, corrupt practices, kickbacks, and bribery.
	Moderna: Has never brought a vaccine to market since its founding, despite fielding 9+ vaccine candidates, none of which made it through phase 3 clinical trials.
	Johnson & Johnson: Named in hundreds of thousands of lawsuits for toxic and/or dangerous products, including drugs, shampoos, medical equipment, and asbestos-contaminated baby powder.
	AstraZeneca: Suspended by two dozen European countries due to severe, lethal adverse reactions, like blood clots.

In 2020, at least 13 senators and 35 US representatives held shares of Johnson & Johnson that produced the vaccine that more than 15 million Americans have received. At least 11 senators and 34 representatives also held shares in Pfizer. Two representatives or their spouses held shares of Moderna during the same year that the world went on lockdown in response to the pandemic. Lawmakers held these investments as Congress was at the center of pandemic relief efforts. In 2020 and 2021, members of Congress voted on six relief bills together worth nearly \$6 trillion. Congress also authorized more than \$10 billion to help drug companies develop and distribute vaccines and forced health insurers to cover the cost of getting the shot. There have been 22 major Covid 19 programs that have "sent" money to states...MN received about \$12 thousand PER CAPITA for use by Gov Timmy...which is the reason you're seeing all those TV ads urging (*threatening?*) you to get the jab. Those federal and state mandates adjudicated by SCOTUS? Let's hope some of the above information will be included.

Every time "someone" tells me I have to wear a mask or get the jab, I ask them to put it in writing...sign it...and take responsibility for any injury. Suddenly they stop "insisting".

The Boys New Year Resolution: More Purr Less Hiss

Book Report

For the **Bob Lee Swagger** fans, Stephen Hunter is releasing the latest on Tuesday. I've got my order in. Sounds like a hoot. Anti-gun congressional committee is grilling Bob Lee when it is attacked and Bob Lee saves the day. If you haven't seen the movie **Shooter**, I highly recommend. It's based on Hunter's **Point of Impact** book.

Reminder:

The **Jack Reacher** series starts February 4 with eight episodes for season one based on the first of 26 books in the series.

Here's a plot suggestion after 26 seasons: Reacher in a VA home for veterans. Recruits assassins to take out bad guys who escaped justice. At their advanced age, life in prison doesn't hold much of a threat.

A reminder: Snopes has no employees and its owner has zero investigative experience. Facebook has hired him to fact check their website. George Soros and the DNC are the only real clients.

The Associated Press published a story about how the seasonal flu just happened to take “an unusual year off” last year, pointing out the obvious reality that our absurdly corrupt government simply counted virtually all cases of flu (and pneumonia) as being “COVID” in order to maximize public panic. Then the CDC announced that, as of January 1, it will be withdrawing the standard PCR test for COVID-19 testing because ... wait for it ... it cannot distinguish between COVID-19 and the common flu! DUH?

Meanwhile, President* Joe Biden’s mass release of illegal aliens into the United States interior is set to cost American taxpayers at least \$6.6 billion annually. And: Joe hijacked \$2 billion of money that should have gone towards COVID testing in NYC and sent it to house illegals at the border.

Epstein’s girl friend was convicted BUT Jonathan Turley said: “One glaring issue in the conviction is that Maxwell conspired to transport girls for sex but, beyond Epstein, none of the men who allegedly had sex with these girls have been prosecuted. ...It is akin to prosecuting a getaway driver but not the bank robbers. She was an enabler not just for Epstein but his high profile friends”.

Bill Clinton highest profile in that list. Meanwhile, a guy who stole Nancy Pelosi’s stapler has been rotting in a jail cell for almost a year while a bunch of rich and powerful pedophiles are running around, free as birds.

Let’s Go Brandon!

New Year Resolutions:

Dig out last year’s resolutions and have a good laugh.

Create some for your congress critter and laugh even harder.

Mine? People should seriously stop expecting “normal” from me. We all know that’s not gonna happen.

Until next week...
