

### The Proper Way To Eat Pumpkin Pie

### Recipe Corner

Just in time for the holidays...you're welcome. Mr. Z likes this recipe!

### Want to buy a fruit warehouse?

As part of the Walz admin's campaign to scare us into compliance, the state spent millions on a refrigerated fruit warehouse to turn it into a morgue. Because there wouldn't be room in the state's mortuaries for the thousands of bodies that would pile up on account of covid, we needed a facility to house the corpses while they awaited burial. It quickly became apparent that the Minnesota model's fatality projections were ridiculous, and the morgue, despite having been renovated and prepared for its intended use at considerable expense, would remain idle.

Thus, Walz's refrigerated fruit warehouse won the first-ever Golden Turkey Award. It represented \$6.9 million down the drain, and was quietly forgotten—with, needless to say, the complicity of the local, monolithically-liberal press. With a proposed sale price of \$5,650,000, the state stands to lose more than a million dollars; a monument to both stupid spending and poor leadership in a crisis.

10.23.2021 #301

All the news I see fit to print.  
Freedom of the press belongs to those who own one.

This Biden admin official claims to be an expert on food disorders and mental health issues while being obese and "decertifying" his biological sex. The Biden Administration announced that Rachel Levine was sworn in as the first female four-star admiral in public health corps. So a pretend president makes a pretend female a pretend admiral? Maybe if we laugh louder he/she/it will insist on a fifth star?

Meanwhile, China is expanding its nuclear missile silo field and just launched a new hypersonic nuclear-capable missile that circled the entire globe at low-orbit. Pentagon was "startled". Guess they were too busy pushing vaccines and critical race theory. They were so busy that they missed this news report: South Korean President Travels to Hawaii to Repatriate US Servicemembers' Remains — Biden Admin Skips Event, Sends No One. But they generated this one:

Biden Administration 'Strongly Opposes' Honorable Discharge for Troops Who Refuse COVID-19 Vaccine

In other news:

From Behavioral Brain Research: *naps are better than caffeine for improving verbal memory, motor skills, and perceptual learning...while I forget what I was going to do when walking into a room...unless it's the bathroom.*

### Bon Mots

Someone who thinks logically provides a nice contrast to the real world.

### Book Report

Prometheus is an Amazon Prime movie from 2012 directed by Ridley Scott as prequel to Alien in 1979 which he also directed. None of the other Alien movies come close. This one stars Noomi Rapace who is also star of the Girl With Dragon Tattoo films. The Hollywood versions of the Dragon Tattoo films are not worth comparing to the original Swedish versions.

Every major Lame Stream Media has this company as a sponsor...while they push vaccinations. No wonder you can't get the facts.

# MADE IN AMERICA BY AMERICANS

The major backlog of container ships at the ports of Los Angeles and Long Beach is the worst its ever been, with 100+ ships waiting to enter and unload. That number breaks last month's record of 97 vessels. To put it into context, there would typically be about 17 ships at anchor in pre-pandemic times. The two Southern California ports account for 40% of all shipping containers entering the U.S. The many reasons for the cargo crunch, included a shortage of dock workers, a lack of truckers, limited capacity for containers at the ports, and the fact that the ports were not (*until recently*) operating at nights and on weekends. Biden "mandated" they stay open 24/7 but forgot that most of the warehouse destinations for the cargo aren't open 24/7...oops! There's also the shortage of 80,000 truck drivers, President the American Trucking Association said. Now add the buildup of freight at the ports likely due to a labor shortage spurred on by far-left policies of paying people not to work via large unemployment benefits.

Meanwhile, transportation Secretary Pete Buttigieg has been missing from his post. Buttigieg has taken paternity leave since mid-August with his husband and two children.

Joe is old enough to know about the Red Ball Express...a famed truck convoy system that supplied Allied forces moving quickly through Europe after breaking out from Normandy in 1944 to expedite cargo following a marked route closed to civilian traffic. Got his eye on the National Guard?

**If you want the Democrats to actually try and solve the supply chain problem...just tell them that there are ballots for the 2022 elections in those containers.**

## ← Can you trust this?

A Made in USA mark is a country of origin label that indicates the product is "**all or virtually all**" made in the United States. The label is regulated by the Federal Trade Commission (FTC).

The reason for that Made in America logo? I don't think you'll find a lot of backlog at the ports for those products.

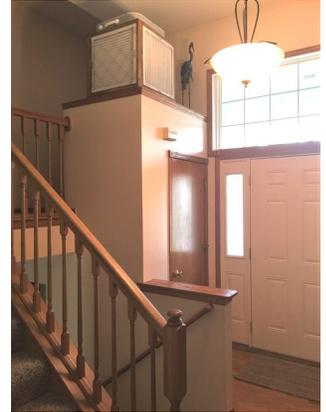

However (*you knew that was coming*) there are labels that say...assembled in America...or designed in America...or the label is made in America and added to Chinese products. The FTC isn't too bright nor diligent about labels...unless it involves race. Personally, I'll spend my money on products that deliver...like my Miata I've been driving for 30 years after bad experiences with Ford and Chevrolet and Dodge. Speaking of delivery, Amazon continues to provide quick delivery of products made everywhere. Wonder how the supply chain problem will affect them?

## Mal Mots

**If you think there is good in everybody, you haven't met everybody.**

**You're welcome.**

Then there is Made In My Garage...I created a wood frame for the air filter with a fan that is so quiet you can't hear it running. The four MERV 8 filters are more efficient than the single filter in the furnace. The prototype I made using duct tape is in the garage to catch the sawdust made when making the wood frame. Catch 22 but it kept me busy and I enjoyed figuring out the joints and grooves. Yes, I'm easily amused.

**Until next week...**
