US food manufacturing plants that were damaged from 2021 to 2022 under Biden now total 95 suspiciously destroyed, damaged or impacted by "accidental fires" or disease or general causes. At least 18 major fires have erupted at food industry facilities in just the past six months.

Death toll:

- 299,600 Ducks**
- 2,412,800 Turkeys**
- 40,807,300 Chickens**

The government is ramping up construction of **Soylent Green** processing plants?

All the news I see fit to print.

Freedom of the press belongs to those who own one.

THIS is the Biden health secretary with "its" family. THIS is the person who will rule on red laws to determine if you are mentally fit to own a gun. Democrats say they believe in science...just not that chromosome thingy. And then there is non-binary to explain gender "identities" that are not solely male or female. Which results in either binary or non-binary...which is a binary decision. I guess 2+2 does equal 5? I will pause here and pour more wine.

Other news...inflation is now at 8.6%...gas is now over \$5/gallon nationally and close to \$10/gallon in California which has highest gas taxes...price of diesel fuel even higher which means supply chain slows down...there's a shortage of baby formula and now tampons (*maybe recall the tampons from men's room?*)...gun felonies are being dismissed with no charges in major Democrat run cities thanks to prosecutors backed by George Soros (*did get one recalled in San Francisco...but dozens are still in office*)...you see a pattern yet? It gets worse. People are moving out of the Democrat states resulting in a loss of taxes they paid while living under Democrat rule.

IRS data shows 2020 loss of tax revenue

Minnesota lost \$1.2 Billion

Illinois lost \$8.5 Billion

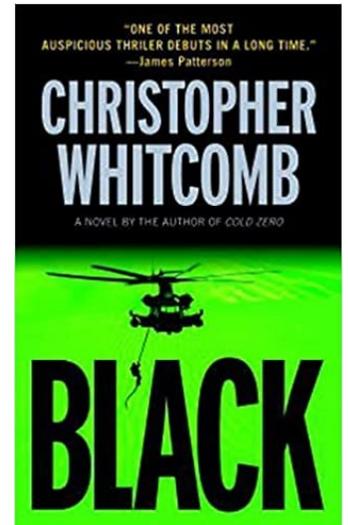

California Lost \$17.8 Billion

Florida GAINED \$23.7 Billion

Guess which states will be raising taxes?

Book Report

I did not know the FBI had an elite Hostage Rescue Team (HRT). The author was a member and draws on his experience to craft fictional use of this agency. Was a resource used by Steve Martini which led me to find him. Well worth the search.

This is the true story as mentioned in my review of his free Amazon eBook. The author is successful due to the Amazon offerings that some publishers may regret avoiding. Hindsight 20/20?

The mug shot was finally released

Nancy's husband Paul Pelosi pulled out onto S-29 to cross it, ignoring a stop sign, and was struck by Jesus V. Lopez, who was driving a 2014 Jeep. Lopez was reportedly traveling northbound on the state road.

At the scene of the accident, Pelosi was found to have been over the legal blood alcohol limit. He was arrested on two misdemeanor counts of driving under the influence and driving with a blood alcohol content level of 0.08 or higher.

Police waited more than 4 hours to utilize a breathalyzer on Pelosi, in which time his blood alcohol content likely was reduced. He's out on \$5000 bail with his court appearance not until August.

Wonder if Michael Avenatti (*the lawyer going to jail for stealing from Stormy Daniels and CNN's pick for next president*) will chase the civil case against Pelosi on behalf of Mr. Lopez?

The Pelosi's have DEEP pockets:

Nancy Pelosi will retire as a Congress Critter at \$174,000 Dollars a year for LIFE. She will retire as SPEAKER at \$223,500 a year Plus she will receive an additional \$193,400 a year for when she was Minority Leader, the fact that she has become rich while in office notwithstanding. That's \$803,700 Dollars a year for LIFE including FREE medical which is not available to us.... the taxpayers. She is just one of the hundreds of Senators and Congress critters that float in and out of Congress every year! **Let's start flushing them!**

Looking back at COVID

The world first started to hear about a novel coronavirus in early January 2020, with reports of an alleged new pneumonia like illness spreading across Wuhan, China. However, the world did not actually know of Covid-19 until February 2020, because it was not until the 11th of that month that WHO officially named the disease Covid-19.

Why does United States Government data show that the U.S. Department of Defense (DOD) awarded a contract on 12 November 2019 to Labyrinth Global Health INC. for 'COVID -19 Research', at least one month before the alleged emergence of the novel coronavirus, and three months before it was officially dubbed Covid-19? The contract awarded in November 2019 for 'COVID-19 Research' was not only instructed to take place in Ukraine, it was in fact part of a much larger contract for a 'Biological threat reduction program in Ukraine'. The Pentagon revealed that the US government supported 46 biological research facilities in Ukraine for the past 20 years. The Government of the United States has a website called 'USA Spending', an official open data source of federal spending information. According to the site as of 12th April 2021 the US Government has spent a mind-blowing \$3.63 **trillion** "in response to COVID-19".

BTW: seasonal flu deaths are more than those attributed to COVID 19. Now we have monkeypox...and the pharma companies are already talking about vaccines. Maybe we should make all the monkeys wear face masks? Somebody is making a LOT of money from these "emergencies".

Retirement means you don't have to get up just because you woke up. You're welcome

Candidates backed by former President Donald J. Trump had a near-perfect night in the South Carolina, Nevada, and North Dakota primaries as 12 candidates secured their nominations, while only one lost her race. Donald Trump's endorsement record now stands at 129-8 in Republican primaries this midterm election cycle. (*Suggestion: add a T behind their name instead of the D or R?*)
